

CROMWELL NAVAL

JAVA BACKEND DEVELOPER

General Trias City, Cavite | naval.lucianocromwell@gmail.com | +63 9611235693

TECHNICAL SKILLS

Languages: Java 17+, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, DTOs, Bean Validation, Exception Handling, Swagger/OpenAPI

Frontend: ReactJS, HTML5, CSS3, Tailwind

Database: MySQL, PostgreSQL, Firebase, Redis

Testing: JUnit 5, Mockito, MockMvc, Integration Testing, API Testing

Tools: Git, GitHub, Postman, Docker, MySQL Workbench, IntelliJ IDEA, Linux

EXPERIENCE

Backend Developer — Internship

- Developed a Scheduling Management System for the departments of Divine Grace Medical Center to organize patient schedules and prevent scheduling conflicts.
- Deployed the Scheduling Management System on a local network to restrict access to authorized hospital employees and enhance database security.

Backend Developer / Lead Developer — Thesis Project

- Led a development team of five members to ensure a structured, efficient, and timely development process.
- Planned and created project documentation, user manuals, and system diagrams to maintain a clear project scope and help clients understand the system's functionality and workflow.
- Developed the backend of an Attendance Management System for an elementary school to streamline attendance management and provide SMS alerts to parents regarding their children's attendance and whereabouts.

PROJECTS

Scheduling Management System

- Developed a Scheduling Management System for Divine Grace Medical Center to replace manual Excel-based scheduling and eliminate conflicting schedules.
- Designed a user-friendly interface with automated conflict detection, patient information management, and activity logs to help administrators monitor system activities and identify anomalies.
- Deployed the system on a local network to restrict access to authorized hospital employees and protect sensitive patient data in accordance with data privacy requirements.

Attendance Management System

- Replaced the school's time-consuming pen-and-paper attendance process with an RFID-based attendance system that automatically records student attendance and sends SMS alerts to parents to keep them informed of their children's attendance and whereabouts.
- Developed the backend to process RFID attendance records, manage student information, and handle attendance tracking.
- Implemented an SMS notification system to automatically notify parents when their children record attendance.

EDUCATION

Cavite State University - General Trias City Campus

2025-2026

Bachelor of Science in Information Technology
